Marouane BENABDELKADER

Computer science student

Graduated with a DUT in computer engineering, specialized in software engineering, and currently pursuing a degree in Big Data. Practical experience gained through significant projects and internships. Seeking an internship to apply my skills in massive data analysis in a dynamic and innovative environment. Passionate about continuous learning and motivated to contribute to advanced technological projects

EDUCATION

Professional Degree in Infrastructure, Processing and Analysis of Massive Data (BIG DATA)
Ecole Supérieure de Technologie de Fkih Ben Salah

10/2023 - Present   *Fquih Ben Salah*

DUT : Génie Informatique Option Génie logiciel
Ecole Supérieur de Technologie de Fès

09/2021 - 07/2023   *Fès*

Mathématiques, Informatique, Physique
Faculté des Sciences et Techniques de Fès

09/2020 - 07/2021   *Fès*

Baccalauréat Science Physique
lycée Bir Anzarane

09/2019 - 07/2020

PROFESSIONAL EXPERIENCE

Backend Developer
Innov DS

04/2023 - 06/2023   *Fès*

Achievements/Tasks

- Design and development of an e-commerce platform
- Implementation of a back-end architecture with Node.js and Express.js for managing users, products, and authentication.
- Secure management of application data using MongoDB as the database system.

JEE Developer
Ecole Supérieur de Technologie de Fès

10/2022 - 04/2023   *Fès*

Achievements/Tasks

- **Development of SwiftServe :** Design and development of a web framework based on Jakarta EE and following the MVC2 model.
- **Web Services Automation :** Creation of a mechanism to automatically generate RESTful web services.
- **Routing and Middleware :** Implementation of robust routing and development of middleware for additional functionalities.
- **Documentation** : Writing of complete documentation for the framework, including a user guide and API documentation.
- **Tests** : Development of unit tests to ensure code quality.

Full Stack Developer
Moda Cerame

07/2022 - 08/2022   *Fquih Ben Salah*

Achievements/Tasks

- Development of a web-based stock management application with authentication

SKILLS

C / C++   JAVA   JEE   JUnit   Android (JAVA)   HTML/CSS   React JS   JavaScript   NodeJS   ExpressJS   Docker   SQL - NoSQL   Redis   SQL Server   Python   FAST API   Web Scraping   Numpy   Pandas   Computer Network Administration   Power BI   Hadoop ecosystem   Machine Learning   Conception (Merise - UML)
